18 February 1952

Chief of Station, Frankfurt  
Attn: ☐ ☐  
Chief, EE

KIBITZ-VULTURE Development

REF: MGQA-703

1. We are glad to know that ☐ will shortly be at headquarters for a TDY session. We will be only too happy to arrange the contacts as outlined in reference memorandum and we will appreciate the opportunity of discussing KIBITZ affairs with him. We have already had several debriefing sessions with ☐.
2. While we are discussing personnel matters, we should tell you that we have obtained a good picture of the available manpower for KIBITZ from our talks with ☐ ☐. It would appear to us that you could easily use one additional full-time person, with the further possibility that two people might be needed. We have a well-qualified person here who could be made available to you within the near future; he might also serve as a replacement for ☐ in the event that the latter cannot obtain an extension of time. Please indicate as soon as possible whether you can use one person or two. ☐ has already approved two full-time staybehind case officers for BOB.
3. We are enclosing a copy of <sup>D/C LEAN</sup> Notice 21-51 which deals with burial containers. We have taken the liberty of ordering 50 of the EC-2 type containers for the KIBITZ program and would like to have an up to date list of the kinds of supplies and equipment which you intend to include with each burial. This container has been tested for as long as seven years under fifteen feet of water and has proved eminently satisfactory. We assume that this type of container is suited to your purposes; please inform us if we are in error.
